

IFRAT IKHTEAR UDDIN

Phone: 01787161449 | Email: ifrat.ikhatear@northsouth.edu
Portfolio: ifratmitul.netlify.app | GitHub: github.com/ifratmitul

I'm a passionate web developer with firm belief in responsive web design. I like working on both front-end and back-end side of the project. I'm an energetic and ambitious person who have developed a mature and responsible approach to finish task on time. Currently looking for a job where I will be able to learn & contribute with both my leadership and technical skills.

EXPERIENCE

JULY 2019 - OCTOBER 2019

TECHNICAL DOCUMENTATION SPECIALIST, RAPPLES ENTERTAINMENTS LIMITED [PART-TIME]

As a technical documentation specialist one of my responsibility was to prepare documentation of system architecture, APIs and variables used in different part of the project, so that Front-end, Back-end & ML engineers can work in harmony with the defined APIs and Variables. Another responsibility was to prepare documentation of clients about how we are designing the system as per their requirements and also about the progress of the project.

Ifrat Ikhtear Uddin, ASM Nawroz Jahan, MD. Nasim Mahmud Rone, Dr. Nova Ahmed (5-7 June 2020). A low-cost Boat Distress Alert & Safety System. 2020 IEEE Region 10 Symposium (TENSYP), Dhaka, Bangladesh [Awaiting Indexing]

PROJECTS

For my personal and academic project I have worked with many technology like React, firebase, Nodejs, MongoDB, .NET, PHP, etc. These are few of my projects, Please, visit my [GitHub](#) to see more of my works.

- **Hotel Booking Website UI using React**

A complete hotel booking website UI was developed using REACT with various API integration like contentful API to show dynamic data in the UI

- **Football League Table UI using React**

A complete football league table UI which shows league standing. Also, User can click on any team to see details of that team in a separated modal which shows total match played, wins, loss, draws for that specific team only.

- **Tourism Package Buying E-Commerce Web App using PHP**

This web application is a full e-commerce website where user can buy different tour package. Sandbox Paypal payment method was implemented in this project. PHP, Ajax, MySQL DB, HTML, CSS, JavaScript were used to develop this project.

- **Food Delivery web App using .NET MVC**

A complete food delivery website with 4 different access type for customer, vendor, delivery persona and admin. Admin can add new vendor and delivery guys where customer can only order while logged in and can see full status of where his/her food is for example if it's still cooking or picked up by delivery etc.

- **Online Classroom Web App using Django**

It's a virtual online classroom experience where student join a classroom using a unique key which teacher assigns while creating the class room. Teacher can post announcement, files and student can comment as well. Django, HTML, CSS, JavaScript, Bootstrap were used to develop this web application.
